# Day 4 - Dynamic Frontend Components - Food Chukh
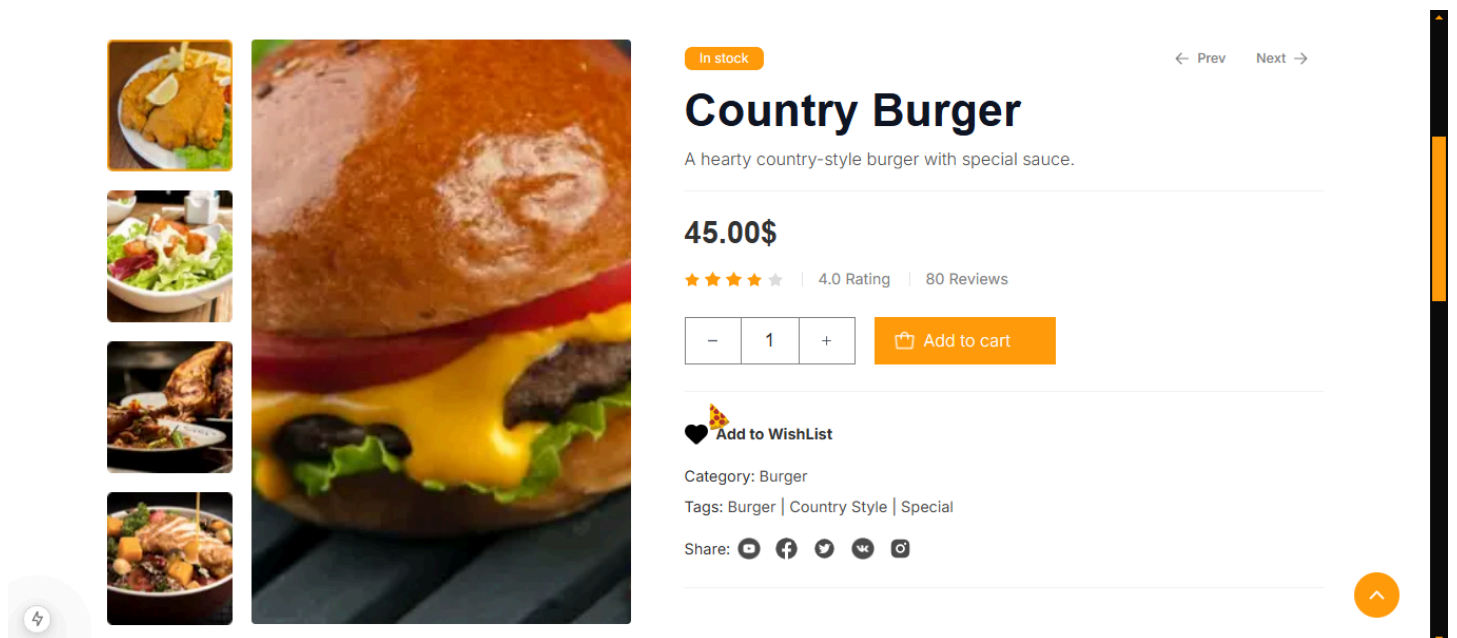

- ## Funtional Components:

  ### 1. Search Bar:

Problem Faced & Solution:
All the videos availiable on social media platforms only provide search bar functionality by making some <li> tags and then filtering data and showing results, but, in my case firstly I have to fetch data from sanity and then filter results, based on search & showing results to the user.
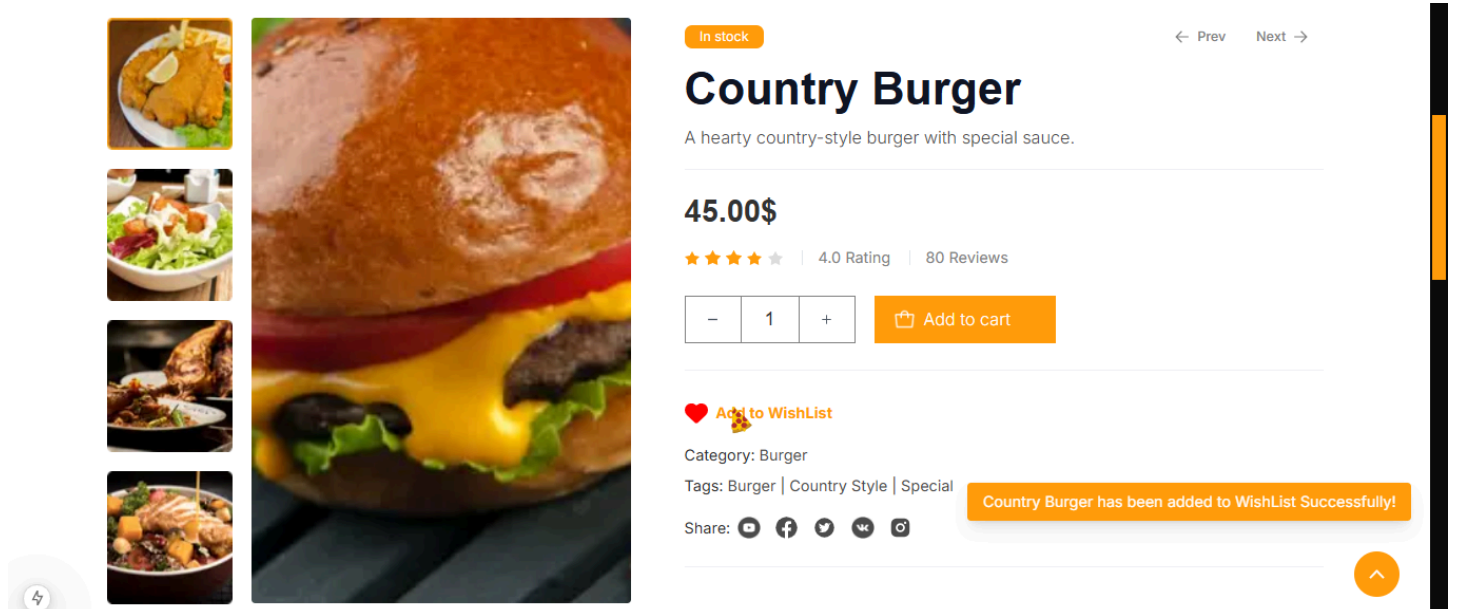

2. Wish List:

**Added a wish list functionality with the help of context API**
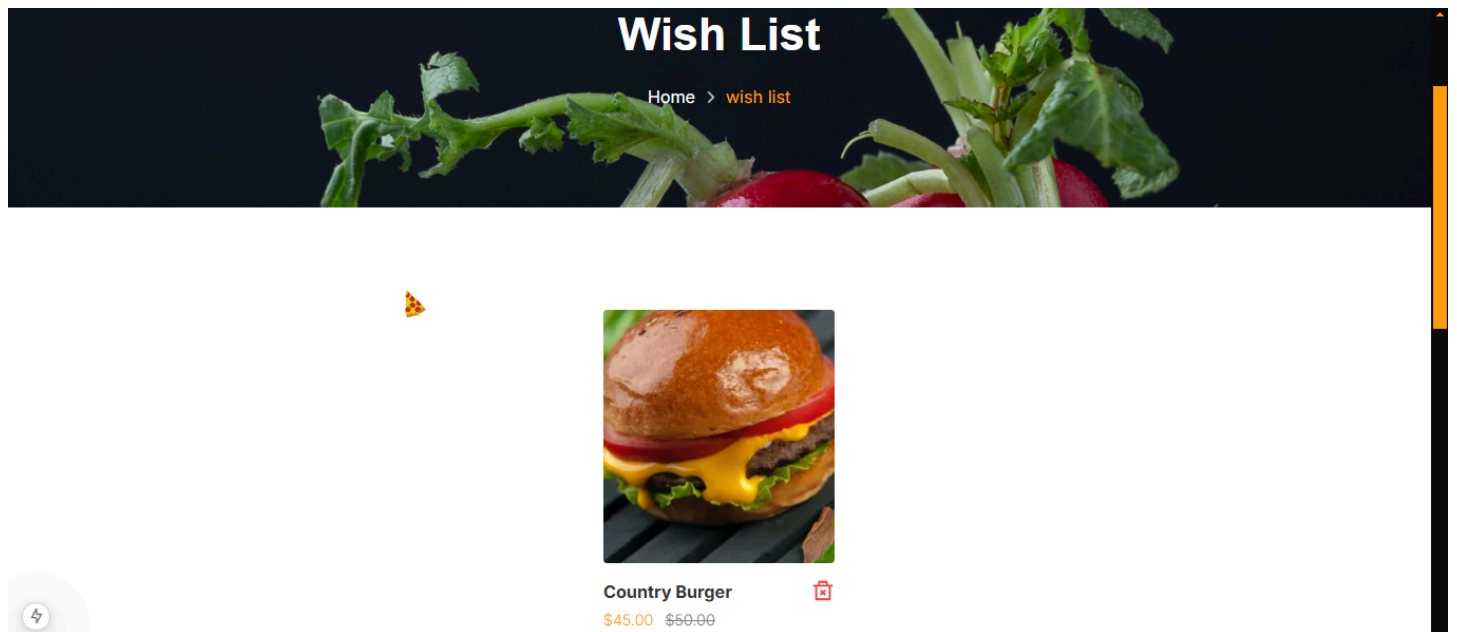

- adding to wishlist through product details page:

- clicking on heart icon to add to wishlist and showing notification:

- number on the userIcon showing wishlist items present:

- clicking on *Your Wishlist* option & opening wishList route:

3. Add to cart:

Added a Add to Cart functionality with the help of context API

- similarly like add to wishlist functionality :

  firstly adding to cart with product details page:

- Than going to shopping cart route through header :

- clicking on bag icon & opening the route for cart:

Product	Price	Quantity	Total	Remove
Country Burger ★★★★☆	$45.00	− 1 +	$45.00	✕

Coupon Code

Enter a coupon code to receive a discount on your purchase.

| Enter your code | Apply |

Total Bill

Cart Subtotal	$45.00
Shipping Charge	$0.00
Total Amount	**$45.00**

Proceed to Checkout

- Proceed to checkout:
